

environmental and maintenance service

the drayton group | simply the best

Drayton Group, Inc. We aren't the only environmental and maintenance service in town. We haven't been here the longest. We aren't the biggest.

We're simply the best.

The Drayton Group is SBA Section 8 Certified . . . and Certified by the National Minority Business Development Council.

Our highly trained staff uses the best technology available — to help improve your profitability by minimizing downtime and reducing maintenance and operational expenses.

We employ the best and safest practices to help prevent lost productivity traceable to air-related or other environmental health issues.

Whatever you need done . . . technical machine cleaning, HVAC servicing and cleaning, dry ice blasting, construction cleanup, paint removal, facility support services, industrial floor cleaning . . .

Drayton Group can do it.

Contact us today. And visit our site www.draytongroupinc.com

Technical Machine Cleaning

The cleanliness of your machinery is directly related to how efficiently they perform, what harmful pollutants they emit. We call it "Mechanical Hygiene."

Through Technical Machine Cleaning, Drayton will not only keep your machines clean and functional, but ... by employing green cleaning practices ... we'll help keep the environment your employees work in healthy and productive.

Ventilation Mechanical Hygiene

According to the EPA, poor IAQ costs industry an estimated \$20 billion dollars annually in terms of lost productivity, health care and absenteeism.

Let Drayton service your facility's HVAC system — and help eliminate your potential losses.

HVAC servicing includes inspecting pipes and insulation for leakage and damage, duct cleaning, mold and moisture prevention and establishing a maintenance schedule.

Dry Ice Blasting

The best cleaning solution ... high-velocity, pelletized dry ice effectively removes dirt — with no drying time, disposal issues or component damage. Minimizes downtime.

Facility Services

Drayton can also handle your most basic housekeeping needs. Facility Services is another name for Janitorial Cleaning and includes traditional services like carpet and restroom cleaning, and window washing.

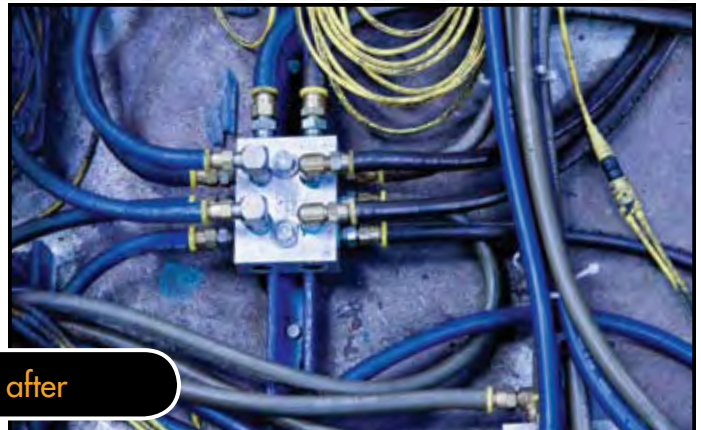

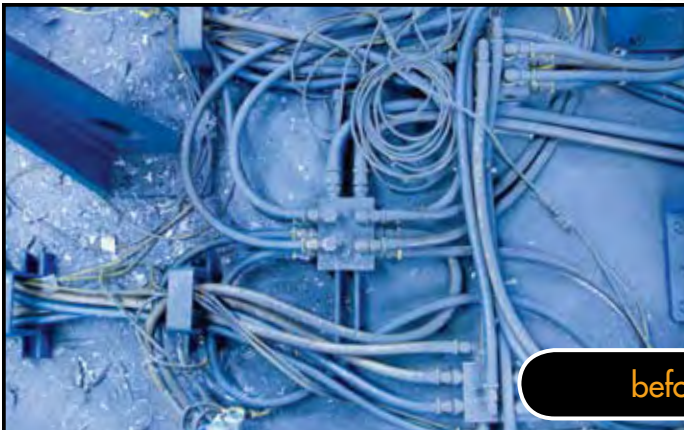

Manpower Placement

Wherever you are, so are we.

Drayton provides skilled and unskilled manpower placement services — nationally.

We hire and train ... contract or temporary teams ... for a broad range of traditional services, including: Pressure Washing/Steam/Solvent Based Cleaning/Grit Blasting.

environmental and maintenance service

before / after
